CONTACT LENS POLICY

Our contact lens examination is an essential component of our patient's overall refractive program.

We are committed to taking the time and effort to fit your contact lenses properly. The goal of a contact lens fitting is to determine the most appropriate lens for your optimal vision and comfort. You will have access to safe care and usage instructions of contact lenses. A contact lens fitting does not have to be performed on the day of the comprehensive exam but must be done within **90 days**.

Annual Contact Lens Evaluation:

A contact lens prescription is valid for one year as mandated by law. In order to update the contact lens prescription, all patients will need a yearly examination. This is to ensure that your eyes are healthy for continued wear and that the contact lenses are fitting well. Contact lens prescriptions cannot be renewed without the annual exam.

Contact lens fitting fee for Spherical lenses: \$50

Contact lens fitting fee for Astigmatism (Toric) lenses: \$75

Contact lens fitting fee for Presbyopia (Monovision): \$85 (1 lens is distance vision; 1 lens is near vision)

Contact lens fitting fee for Presbyopia (Multifocal): \$95 (Simultaneous vision, both distance and near)

The fitting fees include a courtesy follow up visit as required up to 1 month. After this courtesy period if a refit is needed or desired, a new fitting fee will be incurred.

The contact lens fitting is a stand-alone service. It is separate from the patient eye exam, testing, and/or refraction.

All fees are due at the time of service. Full payment is required for all contact lens prescriptions to be released.

I agree to the service and terms above in the contact lens policy. These policies are subject to change at any time without notice.
